## Mounting instruction – Hi-Fi-Series – HM

- 10.** Now close the cage but be careful with the special HDD screws.

**IMPORTANT! ATTENTION!!!**

**11. Installation of 3,5" HDD (only HM-03)**

Please see step 7 first. In order to mount the HDD on the bottom of the cage, install the screws in the middle and rear holes of the HDD. Be careful when you slide in the HDD into the cage not to touch the nearby iMON module .

- 12.** Hold the HDD horizontally and slide it into the cage. Now switch the safety hook (yellow/red arrow) to fix the HDD.

### 13. Installation of the 5,25" device

To install a 5,25" ODD use the necessary white screws (Img. 2) provided in the accessory box.

Img.2 ODD Screw

14. Put the ODD in the slide rails like shown on the image and fix it with the safety hook on the ODD cage. Now connect all components, e.g. motherboard, VGA card, fans etc. with the PSU.

### 15. Connect the front cables of the case

E.g. Power Switch, Power LED, Reset button, etc. according to the instruction of your motherboard manual.

### 16. Close the case

When everything is installed, screw the top cover back onto the case.

*Have fun with your new CHIEFTEC case!*
